A COSMETIC APPLICATION OF ROD-COIL POLYMERS

5 The present invention relates to a cosmetic
composition containing, in a physiologically acceptable
medium, at least one rod-coil type block copolymer
comprising at least one "coil" polymeric block structure
of variable conformation bonded to at least one "rod"
10 block structure of restricted conformation, the
composition being characterized in that said rod block
structure is of polymeric nature and is constituted in
full or in part of peptide motifs or the like with some
or all of the free hydrogen atoms of said peptide motifs
15 participating in non-covalent hydrogen bonds within the
rod structure.
